	IAWC	all sizes	25 pcs per box
	FNC	all sizes	25 pcs per box

PRIVATE LABELS AVAILABLE

We can add your own label to the boxes – either Trax branded or white boxes available.

THE BENEFITS OF CAM-BACK™ WEIGHTS

1) **SAFETY** – The top cam increases the force required to remove the weight which ensures it will not fall away from the rim.

2) **RETENTION** – The bottom cam forces the weight body away from the rim thereby opening the spring clip and significantly increasing retention. This increased retention ensures no movement of the weight on thin section rims which can cause imbalance.

Heavy braking can make weights slide around the rim causing imbalance and wheel vibration. CAM-BACK™ weights eliminate this problem by giving the highest retention and a universal fitment across heavy duty and thin section rims.

WITHOUT CAM-BACK™

WITH CAM-BACK™

ABOUT TRAX JH LTD

**APPROVED BY THE
AUTOMOTIVE INDUSTRY**

Trax wheel balance weights are made by Trax JH Ltd, one of Europe's largest balance weight producers. The company specialises in the design and manufacture of weights to Original Equipment (OE) specifications ensuring high performance and consistent quality. Exporting to over 25 countries, Trax is an international business with brand recognition for design, quality and service.
